

17-415 NECK-THREAD MATRIX

SOURCE CHECK / 23 SEP 2026

ONE FINISH / FOUR COMPONENT TYPES / FIVE VERIFIED 9 mL CYLINDER GLASS FINISHES

Roll-on outer caps / 10

7 solid finishes + 3 dotted; one outer cap option, either roller material

Fine-mist sprayers / 6

Separate spray mechanisms; not roll-on caps

Treatment pumps / 3

Lotion / treatment, not spray

Roller inserts / 2 materials

Source assembly details: insert is seated on the bottle, beneath the outer cap.

Assembly rule

Choose the 17-415 neck first; then choose one of three paths:

ROLLER = one insert (plastic or metal ball) + one of 10 outer caps

SPRAY = one of 6 fine-mist sprayer finishes

PUMP = one of 3 treatment / lotion pump finishes

17-415 FINISH

CLEAR

9 mL Cylinder

17-415 / 70 mm body

FROSTED

9 mL Cylinder

17-415 / 74 mm body

GBCylFrst9MtlRollBlkDot

SWIRL

9 mL Cylinder

17-415 / 74 mm body

GBCylSwrl9MtlRollBlkDot

COUNT RULE 10 roll-on caps x 2 roller materials + 6 sprayers + 3 pumps = 29 assembled options per glass finish.

Five current Cylinder finishes x 29 = 145 Convex glass assemblies. Photos are cap-off source plates; roller inserts remain visibly seated.

Thread equality guides the candidate set; insert seating, spray/pump dip tube, and SKU identity still require exact-assembly verification.
